ПРИМЕРНИ ВЪПРОСИ: C_ВОЕ_30

Забележка: Примерните въпроси са изготвени единствено за целите на вашата самоподготовка и не са включени в реалните изпити за сертификация. Справянето с тези въпроси не ви гарантира успешното преминаване на изпита. Същинският изпит обхваща по-широк кръг от теми, затова преди явяване на изпит за сертификация се запознайте с всички тематични области, посочени в описанието на изпита.

SAP Certified Application Associate – SAP BusinessObjects Enterprise XI 3.x

Въпроси:

1. You want to use the Import Wizard to import objects from a test environment into your production environment.

Which settings must you select to maintain the rights associated with the imported objects?

Note: There are 2 correct answers to this question?

a)	<input type="radio"/>	Import user groups
b)	<input type="radio"/>	Import users
c)	<input type="radio"/>	Retain security
d)	<input type="radio"/>	Enforce global security

2. Which factors must you consider in analyzing the reporting requirements that must be met by a BusinessObjects Enterprise system?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	The number of predefined templates instances
b)	<input type="radio"/>	The number of projected instances for all reports on the system
c)	<input type="radio"/>	The number of viewing requests by geographic location
d)	<input type="radio"/>	The transaction isolation level of the reporting database
e)	<input type="radio"/>	The number of users who will view existing reports instances

3. What option do users have for viewing reports in the Central Management Console (CMC).

Please choose the correct answer.

a)	<input type="radio"/>	They can choose any viewer that is available in the CMC preferences.
b)	<input type="radio"/>	They can view reports only with the CMC viewer.
c)	<input type="radio"/>	They can view reports only with the DHTML viewers.
d)	<input type="radio"/>	They cannot view reports in the CMC, only administer the content.

4. Which Web Intelligence Processing Server parameter enables or disables List of Values (LOV) caching per user session?

Please choose the correct answer.

a)	<input type="radio"/>	Enable Real-time Cache
b)	<input type="radio"/>	Share Report Data Between Clients
c)	<input type="radio"/>	Enable Cache-By-Name Access
d)	<input type="radio"/>	Enable List of Values Cache

5. Which statements describe the relationship between a Remote Connection and a Replication Job?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	A Replication Job can only have one Remote Connection.
b)	<input type="radio"/>	A Remote Connection can have only one Replication Job.
c)	<input type="radio"/>	A Remote Connection can have one or more Replication Jobs.
d)	<input type="radio"/>	A Replication Job can have one or more Remote Connections.

6. What are major steps that you must perform when creating a logical content plan for your BusinessObjects Enterprise implementation?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	Create profiles for encyclopedia distribution.
b)	<input type="radio"/>	Specify group access levels for folders and objects.
c)	<input type="radio"/>	Create BusinessObjects Enterprise server groups based on geographical considerations.
d)	<input type="radio"/>	Organize users into functional groups.

7. Which object is retrieved from the Input File Repository Server when refreshing a Web Intelligence document?

Please choose the correct answer.

a)	<input type="radio"/>	Document Instance
b)	<input type="radio"/>	Publication []
c)	<input type="radio"/>	Universe []
d)	<input type="radio"/>	XML Schema

8. Which servers are used when viewing a Voyager workspace?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	Adaptive Processing Server
b)	<input type="radio"/>	Input File Repository Server
c)	<input type="radio"/>	Muli-Dimensional Analysis Server (MDAS)
d)	<input type="radio"/>	Report Application Server

9. For the Web Intelligence Processing Server, what is the recommended service threshold for the "Maximum Simultaneous Connections" per CPU?

Please choose the correct answer.

a)	<input type="radio"/>	25 per CPU
b)	<input type="radio"/>	50 per CPU
c)	<input type="radio"/>	5 per CPU
d)	<input type="radio"/>	10 per CPU

10. Which scenarios describe horizontal scaling of a BusinessObjects Enterprise?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	Installing another Crystal Reports Job Server and Crystal Reports Cache Server on a new server machine
b)	<input type="radio"/>	Upgrading the existing BusinessObjects Enterprise server machines with more RAM and faster hard drives
c)	<input type="radio"/>	Creating an additional Crystal Reports Job Server on the same quad-processor computer
d)	<input type="radio"/>	Adding another Crystal Reports Processing Server to an existing BusinessObjects Enterprise server machine that has unused capacity

11. What type of objects does the Input File Repository Server store?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	Instances
b)	<input type="radio"/>	List of Values
c)	<input type="radio"/>	Reports
d)	<input type="radio"/>	Business Views

12. What is an advantage of configuring the Crystal Reports Processing Server service to run under a domain network account rather than the default Local System account?

Please choose the correct answer.

a)	<input type="radio"/>	Providing the service access to a Central Management Server that is installed on a different system
b)	<input type="radio"/>	Enabling access to an Input and Output File Repository Server (FRS) that is installed on a different system
c)	<input type="radio"/>	Enabling the services to start automatically when the system boots
d)	<input type="radio"/>	Providing the service access to the network printer driver for report rendering

13. You want to adjust processor scheduling on your Windows server to optimize it for BusinessObjects Enterprise. Which performance parameter do you modify?

Please choose the correct answer.

a)	<input type="radio"/>	Background services []
b)	<input type="radio"/>	Fair queuing []

c)	<input type="radio"/>	Start-time fair queuing []
d)	<input type="radio"/>	Programs

14. You attempt to login to the Central Management Console and receive the following error message: "Unable to retrieve cluster members." You confirm that you have network connectivity with the Central Management Server (CMS) host, but discover that there is no CMS running at port 6400. What is the cause?

Please choose the correct answer.

a)	<input type="radio"/>	The ODBC DSN that points to the system database was deleted.
b)	<input type="radio"/>	The Web Connector is improperly configured on the Web Server.
c)	<input type="radio"/>	The Tomcat Web Application Server (WAS) is stopped.
d)	<input type="radio"/>	The Primary CMS in the cluster has stopped.
