ПРИМЕРНИ ВЪПРОСИ: C_ITSP_70

Забележка: Примерните въпроси са изготвени единствено за целите на вашата самоподготовка и не са включени в реалните изпити за сертификация. Справянето с тези въпроси не ви гарантира успешното преминаване на изпита. Същинският изпит обхваща по-широк кръг от теми, затова преди явяване на изпит за сертификация се запознайте с всички тематични области, посочени в описанието на изпита.

SAP Certified Associate Support Engineer

Въпроси:

1. You are setting up SAP Early Watch Alert in SAP Solution Manager.
What data is transferred from the SAP satellite systems into the SAP Solution Manager?

Note: There are three (3) correct answers to this question.

a)	<input type="radio"/>	System configuration data
b)	<input type="radio"/>	Application data
c)	<input type="radio"/>	User logon data (user ID and password)
d)	<input type="radio"/>	Workload by transaction
e)	<input type="radio"/>	Number of active users

2. What error types can be analyzed by using the E2E Exception Analysis in an SAP NetWeaver AS ABAP system?

Please choose the correct answer.

a)	<input type="radio"/>	ABAP SysLog errors ABAP dumps ABAP update errors IDoc errors
b)	<input type="radio"/>	ABAP run-time errors ABAP database inconsistency errors ABAP system errors
c)	<input type="radio"/>	ABAP system errors .Net system errors MDM system errors TREX system
d)	<input type="radio"/>	ABAP problem class errors ABAP application component errors ABAP error message

3. You are performing a workload analysis in SAP Solution Manager by checking general performance in the ABAP Basis Workload Summary.

Which Key Performance Indicators (KPIs) indicate a good performance?

Note: There are three (3) correct answers to this question.

a)	<input type="radio"/>	When the ABAP kernel processing time < 10% response time.
b)	<input type="radio"/>	When the average CPU time < 40 % of (response time – wait time).
c)	<input type="radio"/>	When the IDoc Inbound processing time < 20ms.
d)	<input type="radio"/>	When the wait time < 10% response time.
e)	<input type="radio"/>	When the average database request time < 40 % of (response time – wait time).

4. What runtime environments are provided by SAP NetWeaver?

Note: There are two (2) correct answers to this question.

a)	<input type="radio"/>	AS Java
b)	<input type="radio"/>	JBoss AS
c)	<input type="radio"/>	AS ABAP
d)	<input type="radio"/>	Apache Tomcat
e)	<input type="radio"/>	WebSphere AS

5. SAP recommends a three-system landscape for ABAP development. Assume you must correct an error in an ABAP program that occurred in the production system.

In which sequence should you use the three-system landscape to correct the error?

Please choose the correct answer.

a)	<input type="radio"/>	Development system -> quality assurance system -> production system
b)	<input type="radio"/>	Development system -> production system -> quality assurance system
c)	<input type="radio"/>	Quality assurance system -> development system -> production system
d)	<input type="radio"/>	Production system -> quality assurance system -> development system

6. Which of the following functions does SAP Supply Chain Management (SCM) offer?

Please choose the correct answer.

a)	<input type="radio"/>	Communication to customers through different interaction channels
b)	<input type="radio"/>	Product development, safety, quality and maintenance
c)	<input type="radio"/>	Optimization of the procurement strategy with supplier pool
d)	<input type="radio"/>	Planning and optimization of supply chains across company boundaries

7. Which kind of databases can be connected to the DBA Cockpit?

Please choose the correct answer.

a)	<input type="radio"/>	Only databases of non-ABAP systems
b)	<input type="radio"/>	Any third-party database
c)	<input type="radio"/>	Only databases supported by SAP
d)	<input type="radio"/>	Only databases of ABAP systems

8. Which SAP Solution Manger Service Desk interfaces are available?

Note: There are three (3) correct answers to this question.

a)	<input type="radio"/>	Third-party service desk tool
b)	<input type="radio"/>	SAP global support backbone
c)	<input type="radio"/>	SAP Solution Manager Trace Analysis
d)	<input type="radio"/>	Managed SAP systems
e)	<input type="radio"/>	SAP NetWeaver Administration (NWA)

9. Your company implemented the Change Request Management scenario with SAP Solution Manager following the IT Infrastructure Library (ITIL) approach.
What principles are governing the Change Request Management process?

Note: There are three (3) correct answers to this question.

a)	<input type="radio"/>	Each change should be documented.
b)	<input type="radio"/>	The developers engaged in the change implementation can also perform and confirm the acceptance tests.
c)	<input type="radio"/>	The change manager categorizes, approves, and monitors the change requests.
d)	<input type="radio"/>	Each change has to be approved before development starts.
e)	<input type="radio"/>	In the case of urgent corrections, changes can be implemented without approval.

10. SAP recommends a three-system landscape with a development, quality assurance, and productive system.
What is the purpose of the quality assurance system regarding developments?

Please choose the correct answer.

a)	<input type="radio"/>	To check data quality of productive application data after weekly transfer
b)	<input type="radio"/>	To consolidate decentralized development and execute coding checks
c)	<input type="radio"/>	To develop repository objects and execute syntax checks
d)	<input type="radio"/>	To check the changes without influencing production
