- Installation and Configuration
- Server Administration and Management
- Managing the Web Application Servers
- Managing the Central Management Server Databases
- Managing the File Repository Servers
- Managing the Adaptive Servers
- Managing the Crystal Reports Servers
- Managing the Web Intelligence Servers
- Managing the Dashboard Servers
- Managing the Connection Servers
- Managing the Explorer Servers
- Managing the Event Servers
- Troubleshooting SAP BusinessObjects Business Intelligence Platform

Notes

- Course length: 12 hours
- This eLearning course explains and demonstrates what each server component in SAP BusinessObjects Business Intelligence platform does and how it is configured. You will configure each component and learn how information flows from server to server for system processes such as logging on to the system, scheduling reports, and viewing reports. You will learn to use the Central Management Console (CMC) and the Central Configuration Manager (CCM) to manage and configure the servers and will also practice troubleshooting system problems when they arise. The business benefit of this course is that it provides a foundation for system architects/administrators who are responsible for administering servers on SAP BusinessObjects Business Intelligence platform.
