

# SAP BusinessObjects Enterprise XI 3.0/3.1: Designing and Deploying a Solution

## BOE330

---

### Goals

- This four-day instructor-led course teaches system administrators the skills and knowledge required to design and deploy a BusinessObjects Enterprise system.
- In this course, students will learn how to analyze and identify customer requirements in order to design a BusinessObjects Enterprise solution using the concepts of High Availability, Scalability, Sizing, DisasterRecovery and Lifecycle Management.
- Using a case study, students will design, build and troubleshoot a system and then produce a content management plan using advanced security and replication techniques.
- The business benefit of this course is that it provides system architects/administrators with an understanding of the concepts necessary to effectively design and deploy a Business Intelligence solution using the BusinessObjects Enterprise platform.

### Audience

- \* The target audience for this course is system architects/administrators who are experienced with BusinessObjects Enterprise and will be responsible for designing and deploying solutions for their organization.
