

Migrating from SAP BusinessObjects 5.x/6.x to SAP BusinessObjects XI 3.0

BOE350

Goals

- This three-day course is designed to provide you with an understanding of how to migrate from a BusinessObjects TM 5.x/6.x system to BusinessObjects TM XI 3.0.
- By the end of the course, you will understand how to properly plan and assess your migration strategy, understand how users and content will migrate from their source environment, as well as understand the BusinessObjects XI 3.0 security model.
- You will have the opportunity to practice migrating different types of users and content through a series of workshops.
- The business benefit of this course is that you will be able to plan for and implement a successful migration from your source system to BusinessObjects XI 3.0.

Audience

- The target audience for this course is system architects/administrators who are responsible for planning, assessing, and/or implementing a strategy for their organization to migrate from their BusinessObjects 5.x/6.x deployment to the BusinessObjects XI 3.0.
