## SAMPLE QUESTIONS: C\_TSCM42\_65

SAP Certified Application Associate - Production - Planning & Manufacturing with SAP ERP 6.0 EHP5

Disclaimer: These sample questions are for self-evaluation purposes only and do not appear on the actual certification exams. Answering the sample questions correctly is no guarantee that you will pass the certification exam. The certification exam covers a much broader spectrum of topics, so do make sure you have familiarized yourself with all topics listed in the exam competency areas before taking the certification exam.

### Questions

1. You set a rolling planning time fence (firming type = 1) for a material in an SAP ECC system. When an unforeseen production failure occurs, firming planned orders might fall into the past.

How can these firming planned orders be deleted automatically?

Please choose the correct answer.

a)	<input type="radio"/>	Activate demand adjustment in Customizing.
b)	<input type="radio"/>	Use an MRP type in which the roll-forward.
c)	<input type="radio"/>	Use reorganization.
d)	<input type="radio"/>	Use an MRP type in which the roll-backwards mechanism is activated.

2. You are using MRP controllers in an SAP ECC system.

Which of the following statements concerning MRP controllers are correct?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	The MRP controller is maintained in production versions.
b)	<input type="radio"/>	In multilevel single-item planning, materials are selected using the MRP controller.
c)	<input type="radio"/>	An employee responsible for the planning of materials can be assigned to multiple MRP controllers.
d)	<input type="radio"/>	The MRP controller is a central selection criterion for evaluating material requirements planning.

3. Which SAP NetWeaver component realizes cross-system application processes?

Please choose the correct answer. .

a)	<input type="radio"/>	SAP Business Warehouse (SAP BW)
b)	<input type="radio"/>	SAP Enterprise Portal (SAP EP)
c)	<input type="radio"/>	SAP Master Data Management (SAP MDM)
d)	<input type="radio"/>	SAP Exchange Infrastructure (SAP XI) / SAP Process Integration (SAP PI)

4. How can you convert planned orders into production orders in an SAP ECC system?

Note: There are 3 correct answers to this question.

a)	<input type="radio"/>	Automatically, in the planning run (MRP)
b)	<input type="radio"/>	Set the conversion indicator in Customizing for the planned order.
c)	<input type="radio"/>	Use mass processing.
d)	<input type="radio"/>	Use the order progress report.
e)	<input type="radio"/>	Use background processing.

5. Where can you maintain available capacities in an SAP ECC system?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	Routing
b)	<input type="radio"/>	Production supply area
c)	<input type="radio"/>	Pooled capacity
d)	<input type="radio"/>	Work center

6. You want to use production/resource tools in your manufacturing process.

Which production type do you use?

Please choose the correct answer.

a)	<input type="radio"/>	Repetitive manufacturing
b)	<input type="radio"/>	Production order
c)	<input type="radio"/>	Process order
d)	<input type="radio"/>	KANBAN

7. When scheduling a routing in the SAP ECC system, which of the following time elements is a interoperation time?

Please choose the correct answer.

a)	<input type="radio"/>	Safety time
b)	<input type="radio"/>	Float before production
c)	<input type="radio"/>	Processing time
d)	<input type="radio"/>	Setup time

8. Which statements about the reorganization of planned independent requirements in SAP ECC are true?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	The reorganization only deletes planned independent requirements that have no fixed planned orders assigned to them.
b)	<input type="radio"/>	The reorganization only affects planned independent requirements that lie on a time axis on the left side of a specified key date.
c)	<input type="radio"/>	The reorganization can be defined using a plant-specific reorganization interval.
d)	<input type="radio"/>	The reorganization is a form of demand adjustment in which non-consumed planned independent requirements are set to inactive for the planning, but not deleted.

9. Which of the following organizational units can be used for planning and manufacturing in an SAP ECC system?

Note: There are 3 correct answers to this question.

a)	<input type="radio"/>	Distribution channel
b)	<input type="radio"/>	MRP area
c)	<input type="radio"/>	Sales area
d)	<input type="radio"/>	Sales area
e)	<input type="radio"/>	Storage location

10. Which BOM selection possibilities are available for opening a production order?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	Selection by BOM number in the material master of the material to be produced
b)	<input type="radio"/>	Selection using a production version
c)	<input type="radio"/>	Manual selection
d)	<input type="radio"/>	Automatic selection controlled by Customizing settings
e)	<input type="radio"/>	Selection using the production scheduling profile

## Solutions

1 a) Incorrect	2 a) Incorrect	3 a) Incorrect	4 a) Incorrect	5 a) Incorrect
1 b) Correct	2 b) Incorrect	3 b) Incorrect	4 b) Incorrect	5 b) Incorrect
1 c) Incorrect	2 c) Correct	3 c) Incorrect	4 c) Correct	5 c) Correct
1 d) Incorrect	2 d) Correct	3 d) Correct	4 d) Correct	5 d) Correct
			4 e) Correct	
6 a) Incorrect	7 a) Incorrect	8 a) Incorrect	9 a) Incorrect	10 a) Incorrect
6 b) Correct	7 b) Correct	8 b) Correct	9 b) Correct	10 b) Correct
6 c) Incorrect	7 c) Incorrect	8 c) Correct	9 c) Incorrect	10 c) Incorrect
6 d) Incorrect	7 d) Incorrect	8 d) Incorrect	9 d) Correct	10 d) Correct
			9 e) Correct	10 e) Incorrect
